

Dr Mimi Mo,
currently works for GlaxoSmithKline Hong Kong in
Medical Affairs

Mimi received her doctorate degree in Pharmacology and Neuroscience from the University of Oxford and was later awarded a Postdoctoral Fellowship to specialise in gene therapy. Her work in consulting, business, and education has taken her from Europe to American and now to Asia, though her passion for science communication remains unchanged - as Podcaster, writer/editor for the Cheltenham Science Festival and London's Famelab competition. She currently works for GlaxoSmithKline Hong Kong in Medical Affairs.
